Mechanised exploration will impact the local environment along with any advanced development and production activities. In undertaking exploration activities, the Company intends to comply with all environmental laws.</p> <p>Inherent risks when completing exploration activities include, but are not limited to, land disturbance and the disposal of waste products. An incident involving incorrect disposal of waste products could result in delays to exploration, additional costs to remediate the location and any legislative penalties.</p> <p>The Company has procedures implemented to minimise the occurrence of environmental impacts and any subsequent penalties; however, the nature of the activity does involve environmental risks.</p> <p><i>Heritage</i></p> <p>The Company is subject to state and federal laws and regulations concerning Native Title and Heritage rights and interests. The Company is required to ensure that tenure has been adequately surveyed and considered before commencing any activity that would disturb the natural environment and its surroundings.</p> <p>The Company complies with required legislation regarding Native Title and Heritage requirements and, where appropriate, engages a third party to ensure that all requirements are met.</p> <p>While all care is taken to ensure rights and interests are maintained, there is a level of risk inherent in the exploration activity that is unable to be fully mitigated.</p> <p>Otherwise, the Company does not consider that it has any significant exposure to economic and social sustainability risks.</p>
